1. Declaration

I, Naveen Sellathurai, declare that this assignment, titled A3: Major App Dev, is my own original work and has not been copied from any other source except where explicitly acknowledged. I have not engaged in plagiarism, collusion, or any other form of academic misconduct in the preparation and submission of this assignment. All sources of information and data used in this assignment have been properly cited and referenced in accordance with the prescribed guidelines. I have not used unauthorized assistance in the preparation of this assignment and have not allowed any other student to copy my work. I am aware that any breach of academic integrity may result in disciplinary action as per the policies of Monash University, which may include failing this assignment or the course, and further academic penalties.

2. Github Check

Enter your Github details here.

Github Username *Enter your username here*	nsel0009
Repository Shared? *Have you started and shared your assignment repository with your tutor yet?*	https://github.com/nsel0009/FIT5032

3. Self-Evaluation

Rate your performance for each criteria. Put a ✅ (tick) in the box where you think your work belongs.

Criteria	Exceeds Expectations	Meets Expectations	Needs Improvement	Fail to meet expectations
BR (D.1): External Authentication		✅		
BR (D.2): Email			✅	
BR (D.3): Interactive Table Data		✅		
BR (D.4): Deployment to the		✅		

Cloud				
BR (E.1): Cloud Functions		✅		
BR (E.2): Geo Location		✅		
BR (E.3): Accessibility			✅	
BR (E.4): Export		✅		
BR (F.1): Innovation			✅	

4. Screen Recording of BRs

Create a 6-10 minute video showing your advanced web application in action! Upload this video to your Google Drive and put the link here (ensuring that you have updated the access list so its not private).

https://drive.google.com/file/d/1CDONotySdo2J5SAuYVci48gEbfBARG8O/view?usp=sharing

5. BR F.1 - Innovative Features

If you have implemented BR F.1, list your choices below and a brief description of how you implemented it.

0	Exact name of innovative feature (copy-paste from assignment specs). E.g. "`Bulk Email: The new Web Application must be able to send bulk email to selected users.`"	A brief, **specific** description (10-20 words) about how you implemented this in your web application. E.g. "I implemented bulk email to enable staff in my health charity website to send emails to multiple patients.	**Recommendations** for future upgrades (10-50 words)
1	Appointment Booking (using Calendar): The new Web Application must implement booking constraints such as booking conflict management using Calendar.	Users can use a calendar to make bookings for sessions. Admins can also view sessions on the calendar	The visual messaging for selecting events could be extended by having a detailed view of the sessions.
2	Interactive Charts - The new Web Application must display an interactive chart or graph using data from Firestore.	The admin dashboard has a chart that shows all the ratings that users have given as a bar chart.	The chart could be more advanced by showing a bell curve of best fit for better analysis. More charts can also be

			added.
3	Admin Dashboard - Create a dashboard view for the system admin of this environmental charity (you may want to create a seprate role for 'admin'), where they can see an overview of the website including number of users and types of users.	The admin dashboard is where admins can access various index pages, as well as statistics.	The admin dashboard could include the ability to add more users so that admin users can only be added via the admin dashboard rather than the normal register page like it currently is.

6. Reflections: Challenges

What has been the most challenging part of this assignment for you? How has this stretched you as a programmer?

There were multiple functionalities that I had to read documentation and do a lot of experiementing for to get them completed. This stretched me as I had to work with various tools that I have not used before, including from lab work.

7. Declaration: Additional Help

Any tools that you used (including Gen AI or existing code reuse) must be declared here.

Note: GenAI is not allowed for coding purposes in any assignment,

However, you may use GenAI for brainstorming, problem solving and learning. You need to declare all such uses here. One row per help used. More details on how to acknowledge the use of Gen AI can be found here.

Name	Description
Example: ChatGPT for brainstorming ideas	*I used ChatGPT to brainstorm how to do X because I was feeling stuck with Y problem.*
https://fullcalendar.io/	I used documentation and examples from FullCalendar to build my calendar functionality
https://www.emailjs.com/	I used documentation and examples from EmailJS to build my emailing service
https://vue-chartjs.org/	I used documentation and examples from Vue-Chartjs to build my chart
https://leafletjs.com/	I used documentation and examples from Leaflet to build my map.

8. Learning Summary

8.1 Coverage of the Learning Outcomes

8.2 Reflect on your learning and discuss these areas (list and explain)

- The most important thing I have learnt
- The things that helped me most were the labs, as I was able to use a lot my knowledge from the labs to build my website.
- I found the following topics particularly challenging:
    - Cloud functions: It took a while for me to understand how I could set up the functions
    - Hosting: Especially with figuring out package issues where the build failed for hosting.
- I found the following topics particularly interesting
    - Vue.js – It's a part of js that I haven't used before
    - Firebase and Firestore – First time using both
- I feel I learnt these topics, concepts, and/or tools really well
    - How to set up pages on Vue.js and route them
- I still need to work on the following areas

    - Using the various tools to build fancier features. I went basic with my implementation.
- My progress in this unit was alright, as I got the baseline of everything, but didn't really extend myself enough.
- This unit will help me in the future as I can get an understanding of different js frameworks. I have used React and Node before Vue.js
- If I did this unit again I would do the following things differently
    - Look more into the Lecture recordings
- Other
